Aveo2011

Upgrades to the Aveo didn't change its stiff ride, uncomfortable seats, noisy cabin, clumsy handling and slow acceleration. Its 25 mpg overall fuel economy is also disappointing for such a small and slow car. However, the Aveo does offer relatively easy access, decent trunk space and a tight turning circle. In most cases, automotive warranties are based on the vehicle identification number VIN , and the warranty will be valid regardless of ownership. The dealership can tell you exactly how much warranty is left. Reactivate now to get the information you were looking for! Performance Performance. Acceleration Acceleration Acceleration tests are conducted on a smooth, flat pavement straightaway at the track. The time in seconds that a vehicle takes to reach 60 mph from a standstill with the engine idling. Transmission Transmission Transmission performance is determined by shifting smoothness, response, shifter action, and clutch actuation for manual transmissions. Fuel Economy Fuel Economy We perform our own fuel-economy tests, independent of the government's often-quoted EPA figures and the manufacturers' claims. Using a precise fuel-flow measuring device spliced into the fuel line, we run two separate circuits to represent city and highway consumption. CR's Overall Mileage CR's Overall Mileage CR's overall mileage is a composite of measured fuel usage on a prescribed city course and highway cruising; and CR's mile test trip of mixed driving, if tested. In recent road tests, we've discontinued the mile trip test. Braking Braking The braking rating is a composite of wet and dry stopping distances and pedal feel. Braking distance is from 60 mph, with no wheels locked. Emergency Handling Emergency Handling Several factors go into the rating, including the avoidance maneuver speed and confidence, as well as how the vehicle behaves when pushed to its limit. Ride Ride Our expert judgment of how well the suspension isolates and absorbs road imperfections and how steady it keeps the body on various road surfaces. Noise Noise Our expert judgment of the vehicle's interior noise level in everyday driving. Front Seat Comfort Front Seat Comfort Our judgment of how comfortable the front seat is for drivers of various heights. Rear Seat Comfort Rear Seat Comfort Our judgment of how comfortable the rear seat is for two passengers to sit across. Emissions Emissions. Greenhouse Gas Greenhouse Gas The Greenhouse Gas Rating represents the amount of carbon dioxide the vehicle emits compared to other vehicles of the same model year. This score from the EPA ranges from 1 worst to 10 best. Smog Rating Smog Rating The Smog Rating represents the amount of health-damaging and smog-forming airborne pollutants the vehicle emits compared to other vehicles of the same model year. Owner Reports. Worse Better. Reliability History Reliability History The reliability charts are based on responses on hundreds of thousands of vehicles from our latest Annual Auto Survey. Consumer Reports subscribers reported on any serious problems they had with their vehicles during the past 12 months that they considered serious because of cost, failure, safety, or downtime, in any of the trouble spots included in the table below. The results are presented relative to the average model that year. Extra weight is given to the more serious areas such as major engine or transmission problems. Based on this data and further analysis, we predict reliability for the latest year. An X indicates that the vehicle was not manufactured for a specific year. Engine Major Engine Major Engine rebuild or replacement, cylinder head, head gasket, turbo or supercharger, timing chain or timing belt. Engine Minor Engine Minor Accessory belts and pulleys, engine computer, engine mounts, engine knock or ping, oil leaks. Engine Cooling Engine Cooling Radiator, cooling fan, antifreeze leaks, water pump, thermostat, overheating. Transmission Major Transmission Major Transmission rebuild or replacement, torque converter, clutch replacement. Transmission Minor Transmission Minor Gear selector or linkage, leaks, transmission computer, transmission sensor or solenoid, clutch adjustment, rough shifting, slipping transmission. View all Reliability. Owner Satisfaction Owner Satisfaction To learn about satisfaction, CR has collected survey data from our annual survey on more than half a million vehicles. Our subscribers provide great insights into their satisfaction by answering one simple question: If they had it to do all over again, would they definitely buy or lease the same model? In addition, respondents also rate their cars in six categories: driving experience, comfort, value, styling, audio, and climate systems. Driving Experience Driving Experience Includes acceleration and handling. Comfort Comfort Includes seats, climate control, noise, and ride. Value Value Did you get what you wanted relative to the price you paid? Styling Styling How it looks inside and out. View all Owner Satisfaction. Safety Equipment. ABS available. Under development before Daewoo's bankruptcy, the Kalos was the company's first new model introduction following its subsequent takeover by General Motors. Originally designed by Italdesign , the Kalos derives directly from the "Kalos Dream" concept vehicle first presented at the Paris Motor Show and subsequent developmental concepts at the Frankfurt Motor Show, Geneva Auto Show, and at the Geneva Show. During this three-year development period Daewoo was struggling financially, with the ultimate fate of the company and the concept vehicle remaining uncertain. The Kalos was sold in three and four available body styles: a 4-door sedan and 5-door hatchback from the beginning of production in , and a 3-door hatchback available in certain European markets beginning in Two different T front-end styling designs were sold. When released in , the T headlamps were detached from the horizontal amber turn signal strip, located directly below. This detached style, used primarily in South Korea and North America, was used in conjunction with a semi-elliptical grille. When sales in Europe began in , the headlights were an integrated unit that slanted upwards from the "V-shaped" grille towards the front fenders. In Australia, when the Daewoo Kalos was introduced in , the hatchback featured the integrated lighting arrangement, with the detached style used to differentiate the sedans. In South Korea, where the detached lights were used at first, the integrated design was later utilized as a facelift. The T sedan and five-door hatchback featured a swage line running along the lower body to the rear door, which kinks downward prominently on the five-door. Interiors feature a circular motif throughout. Bearing the internal code T and sold in South Korea as the "Daewoo Gentra", revisions included exterior styling changes, a new interior instrument panel and minor equipment changes, including increased sound deadening. A facelifted hatchback with the sedan's updated instrument panel was presented as the Chevrolet Aveo during the Frankfurt Motor Show , to be marketed in Europe and North America. The Korean market received its own distinct restyle of the hatchback, the Gentra X , whose bumper without the distinctly "Chevrolet" split grille was also used for the Pontiac, Holden and Suzuki variants. The car is produced at the GM Uzbekistan plant. The Ravon Nexia R3 is available with the 1. A version of the T is sold in the Brazilian market under the name Chevrolet Cobalt since Unrelated to the previous car sold in North America , this Cobalt replaced the aging local Chevrolet Corsa. The car is equipped with a 1. Flex engine. Although sporting a similar front end style, it is not directly related to the Chevrolet Agile , since it shares the overall underpinnings with the Sonic, [8] while the Agile is derived from the considerably older Opel Corsa B , from Development of the second-generation Aveo was led by GM Korea , with Opel engineers leading platform development along with significant input from engineers from Australia's Holden and Chevrolet of the United States. The Aveo marked the debut of the Gamma II global subcompact platform. Koromhaz described his goal for the Aveo as being a "four-seat motorcycle" and took design inspiration from motorcycles, notably in the Aveo's exposed headlights and motorcycle-style instrument cluster. In Europe, it retained the "Aveo" name, although sales ended there in as the Chevrolet brand was discontinued in Europe. The North American-spec Sonic is available as a 4-door sedan or five-door hatchback. It comes with a 1. On August 2, , the Sonic had entered production at Orion Assembly , with the first cars arriving at dealerships in October. Chevy was the first US automaker to use this process. Delivery of the 4-door sedan started in late of July , and the hatchback followed in August Production ceased in Early models included the 5-door hatchback with a 1. The base model is based on the equivalent of North American LTZ trim level, while the LT model includes alloy wheels and metallic paint. Also includes rear vision camera with guidelines. RS adds: Unique dark silver alloy wheels, rear wing spoiler, RS badging, body kit, leatherette seats with suede inserts, 6-speed manual transmission and an upgraded 1. The facelift brought a restyled front fascia, new LED taillights and refreshed equipment. The Barina sold in Australia and New Zealand was available only with 6-speed conventional automatic, the 4-speed model being dropped, with the same 5-speed manual in the standard model. In marketing the Sonic, GM had the car driven by skateboarder Rob Dyrdek in a full degree rotation referred to as a kickflip off a ramp and over an oversized skateboard. The Sonic was discontinued in Canada after the model year. Chevrolet is discontinuing the Sonic after the model year, due to GM's plans to convert the Orion assembly to EV production and declining sales. There are no plans for a successor. The Sonic ended production on October 20, In several Central American countries, the Aveo nameplate is being used for the third-generation Chevrolet Sail sedan, which went on sale in Mexico in November for the model year. From Wikipedia, the free encyclopedia. For the subcompact car sold in the Mexico and other Central American markets since , see Chevrolet Sail. Motor vehicle. Launched in the model year, the Aveo is in the last year of its second generation, and is a good example of the kind of thinking that came from "Old GM. Success of the Honda Fit and Ford's aggressive marketing of its new Fiesta have made small cars cool, and so Chevy promises an all-new '12 Aveo will become a viable competitor for these cars. The Aveo hatchback and sedan were new for the '07 model year, and the '09 hatchback received a minor facelift. Like the Fit, the Aveo is a tall car, at Other than space efficiency, fuel economy and a really low price, the Aveo doesn't have much going for it, and its biggest competitors are three-year-old compact cars. Bodystyles: Sedan, four-door hatchback. Engine: 1. The addition of standard cabin air filtration and two new exterior colors are the only changes for the Aveo. Until then, expect heavy discounts and incentives to clear the lots of this model. The sleek styling of this car's replacement promises good things to come. Until then, the Aveo is stuck with gawky and cheap-looking exterior styling. Think Daewoo with a bowtie grille and or inch wheels. The 2LT adds heated power sideview mirrors, power windows, locks, remote keyless entry and alarm, cruise control, deluxe cloth seats, wheel-mounted audio controls and XM radio. Aveo's Ecotec four makes horsepower and pound-feet of torque. You buy cars like this for price and fuel efficiency, and the manual version is competitive while the four-speed automatic falls short of its competitors' fuel efficiency. If you want any semblance of performance in this car, the manual is the only choice. Steering feel and handling are subpar. Side-impact and dual-stage front airbags are standard. Four-channel anti-lock brakes with electronic brake force distribution are optional. The four-speed automatic has Hill Control Mode, which lets the driver hold a higher gear on slippery roads. Takata recall as I was heading to work one morning the light I was waiting at turned green as I got ready to go my car shut off completely, but restarted. Ifound out my car was leaking oil on my head gaskets causing it to shut off. My sales rep managed to talk his mechanic to fix that. My coolant reservoir has been emptied suddenly on 4 occasions. One one occasion, while driving on the highways, my car overheated, and was found to have no coolant. After filling it, letting the car cool, and driving 10 minutes down the road, it had overheated and was empty again. That time, and once before, it

was the hose. Another time, the cap was damaged, and was allowing coolant to evaporate. The most recent time, there is a crack in the reservoir, allowing the coolant to leak. However, my overheating warning did not come on. My heat has also not been working, even if I warm my car up ahead of time in the cold weather. The contact owns a Chevrolet Aveo. While driving various speeds, the vehicle lost power and the check engine indicator illuminated. The contact was unable to identify other warning indicators that were illuminated. The vehicle was coasted to the side of the road and restarted. The vehicle was taken to a dealer, but the cause of the failure could not be diagnosed. The failure recurred several times. The manufacturer was not made aware of the failure. The failure mileage was approximately 66, Search CarComplaints. Last month will driving highway, city street and parked all my hoses to my cooling system all busted one after another with in 5 day we could see the week spot in the hose after thy busted, had the thermostat changed, it also blow my head gasket now I cant drive my car it has 74, miles I don't now the cause VIN number is [xxx] information redacted pursuant to the Freedom Of Information Act FOIA , 5 U. This Aveo has only 7, miles and when accelerated to pull out it has no power. I had to pull over to the side of road-turned it off and restarted then drove it about 2 miles and it did it again-very dangerous-unsafe-hope someone looks into this. While driving 35 mph, the check engine light illuminated. The vehicle was taken to the dealer where it was diagnosed that the thermostat failed and needed to be replaced. The vehicle was repaired. The contact stated that the thermostat was replaced three times; however, the failure recurred. The manufacturer was not notified of the failure. The approximate failure mileage was 65, My car has had multiple issue within the 8 months is have had it. My car has miles on it and is a My car was in the shop for a total of two months because, my breaks stopped working on the interstate, it was running hot, my acceleration pickup speed will not work properly. My car is always drifting to the left when I do drive. My check oil light came on, took it to the dealership and had a full tank of oil. They told me again nothing was wrong. My steering wheel has been shaking since I purchased it, when I go up hill my car wont go past 40 mph, then when it reaches to 60 mph it wont stop increasing, when I hit my break going down hill the steering wheel shakes, and the car too. So as I'm driving in motion whether it be 30 mph or 70 mph my car dies out. Does not shut off, but I do not have any acceleration. I have to immediately pull over because I cannot move. I spoke to mechanics and they are saying it is the throttle body. As I research this, there has been so many complaints regarding this against GM and nothing not one thing has been done. Do they not understand that as your driving 70 mph and then have no control of speed in the passing lane or regular lane that you can get killed my another car? I asked if this was under warranty and it is not. It is not part of the power train. Yet GM knows there is a defective part and they are just not willing to fix it. They will wait til someone dies first and then fix it. I am filing a complaint regarding the throttle for it is just not my car for I have researched how many cars this has happened to, and knowing that GM knows about this indicated on complaints to GM this needs to be fixed for safety reasons. If something was to happen while I was driving my grandchildren around or when my daughter drives the car I will never forgive GM. Especially where they know about this part. April is when I bought this used car and have had it towed 2X already and engine lights on 2X had to have repaired. So thinking there has to be recalls on this car and nothing is being shown. I bought by Chevy Aveo in with roughly 27, miles on it. I loved that car and it worked well for me until recently at 45, miles. While driving, minutes into the drive, the car would lose power and fail to accelerate. I would put the pedal all the way to the ground and the spedometer would barely creep up. The first two times it did this it "snapped out" of it and drove the rest of the way with no problems. This last time I had some leaking radiator fluid which the dealer wrote off as a "loose radiator cap". The dealer says they can't find anything wrong with my car. I currently have it at another mechanic for a second opinion. I am extremely disappointed with Chevrolet. Will sell this car asap and never buy from Chevy again! Driving down road and car starts shaking and if you do not press pedal to the floor, the car will go dead. If at red light, the RPM needle goes up and down. If you do not constantly press on gas, it will go dead. I have had to replace my headlights at least 5 times since I bought the car in I have a corolla and I have had to change my headlights maybe twice since I am also having other electrical issues inside. The "seat belt" light that is above clock goes on and off as well as my gear shift lights. With the gear shift lights, just hit it and they will come back on. All of these issues could not be found when I took to dealership under warranty. Now check engine light is on and I will be getting a new car soon. I highly recommend to not buy this car! I was driving on a backroad going about 30 mph. My engine shut off causing me to lose my power steering and power brakes. I was able to get the car into a parking lot and pull my emergency brake. I then shut off and restarted my car. It started fine. It is now at a dealership where they can find nothing wrong. Although it is still stalling on them as well. I bought a Chevy Aveo back in Feb Was on way home sometime in August and getting on to highway from ramp would not

accelerate and running hot according to temp gauge. I got it towed to shop and called the next day to find they could not find nothing wrong!! What is it gonna take for Chevy to fix this issue that I have seen numerous complaints about. I am not able to just go but another car!!!! After driving vehicle I parked it. Started vehicle, accelerated and engine stalled. Idled to parking lot and engine died. Started back up and eventually got it running. Took off from a stop light and stalled when apply gas, finally got it to drive at speed posted. The contact stated that while driving approximately 55 mph, the vehicle decelerated and stalled without warning. The vehicle restarted after numerous attempts and the contact mentioned that th

2002 honda accord fuel filter
pioneer avh p4300dvd wiring diagram
2005 ford taurus transmission fluid

 e failure occurred five times. The vehicle was not diagnosed or repaired. The manufacturer was notified of the failure. The approximate failure mileage was 54, The contact rented a Chevrolet Aveo. The contact was driving an unknown speed and traveled over a pot hole when the vehicle stalled. The vehicle was taken to a private mechanic where the failure could not be diagnosed. The vehicle was not repaired. The manufacturer was not contacted about the failure. The failure mileage and VIN was not available. The contact stated that after having the spark plugs replaced, the engine begin to malfunction while driving 70 mph. The vehicle would not shift out of first gear and an egg smell entered the vehicle. The contact took the vehicle to the dealer for a diagnostic test however, the dealer could not identify the defect of the engine. The dealer repaired the heater blower but that did not remedy the defect. The failure mileage was 41, Not what you are looking for? Search for something else:.
