Gmc envoy

It was introduced for the model year. After the first generation Envoy was discontinued after the model year, the Envoy was reintroduced and redesigned for the model year, and it was available in the GMC line of vehicles from the to model years. The Envoy nameplate had previously used by GM in Canada during the s that was sold only at Chevrolet and Oldsmobile dealers. The Envoy first hit dealers' lots in as a model. The Bravada was redesigned for and the TrailBlazer was redesigned for as well. The Blazer 4-door and the Jimmy 4-door were both discontinued after the model year and the Blazer 2-door and the Jimmy 2-door were both discontinued after the model year the Jimmy was discontinued in Canada after the model-year. Most of the S and Sonoma trucks which share the same chassis were being discontinued during the , and model years. The Envoy had many extra features not available on the regular Jimmy 4-door including: a remote trunk release, heated driver's and passenger's seats, as well as a Bose sound system. Envoy replaced the Jimmy name in GMC's lineup in early for the model year. While it still shared a platform with the Chevrolet TrailBlazer , the exterior styling is different. This smooth, efficient inline 6 engine was duty tested at WOT for k miles before being approved for production, almost 3 years before production started in The 4L60e routes power to the back with rear differential gears varying from 3. Twintube Bilstein shock absorbers dampen the IFS up front and the 5-link coil sprung rear solid axle or opt for GM's Auto-ride air suspension. All models in the line-up have 4-wheel disc brakes. A Displacement on Demand 5. The articulating headrests were discontinued, and made no longer available beginning for the model year for both the Envoy and the Envoy XL. Optional features included an in-dash, six-disc CD changer, a Bose six-speaker premium amplified audio system, a rear DVD entertainment system by Panasonic , a security system, polished aluminum-alloy wheels, a leather-wrapped steering wheel, luxury leather-trimmed seating surfaces, dual heated front bucket seats, and a power moonroof. The uplevel SLT trim level, available from â€", added extra luxury and convenience features to the base SLE trim, including a six-disc, in-dash CD changer, a Bose six-speaker premium amplified audio system, OnStar , polished aluminum-alloy wheels, luxury leather-trimmed seating surfaces, dual heated front bucket seats, Driver Information Center, faux wood interior trim panels, a universal garage door opener system with a travel note recorder, a dual-zone, automatic climate control system, and a driver's memory system for driver's seat, mirrors, and radio preset settings. Optional features included an in-dash, touchscreen GPS navigation system later models , a rear DVD entertainment system by Panasonic , and a power moonroof. The top-of-the-line Denali trim level, available from â€", was the most luxurious trim level of the Envoy, adding additional luxury features to the already luxurious SLT trim. Additional features included additional faux wood interior trim accents, a two-tone, luxury leather-trimmed interior, a 'Denali' emblem for the steering wheel, the 5. During this year, GMC detached many options from packages in order for customers to save money. For the XL model, a new engine was introduced, a 5. Articulating headrests are no longer available. Not many changes were made to any of the models this year. The only changes included the added feature of optional adjustable pedals, optional XM Satellite Radio , and an optional DVD-based navigation system. In , a Denali luxury version of the Envoy became available. Both the standard-length wheelbase Envoy as well as the Envoy XL were available with the Denali trim option. The Envoy Denali features the hallmark bullet pattern grille and an upgraded interior with high-end car-like features such as heated power seats, extensive woodgrain trim, and rain-sensing windshield wipers. It also featured the GM Vortec 5. Across the range, seating was restyled in hopes to increase comfort and quality of control of driving position. Additionally, a touch DVD navigation system was offered as an option. The option of side airbags evolved from previously just front-seat side-impact airbags to full-length side curtain airbags, covering both rows of seats in the XL model, all three rows. For , GMC added standard stability control, called " Stabilitrak ," as well as standard cruise control, OnStar , and a tire pressure monitoring system. For the Denali, new inch alloy wheels were introduced. For side-curtain airbags were made standard as well was XM Satellite Radio and Bluetooth wireless technology for wireless phones. The SUVs were sold or registered in 20 U. The Envoy XL was the full-size counterpart to the five-passenger mid-size Envoy. One unique element of the Envoy XL was the availability of a usable third row that was comfortable for a 6-foot 1. This roof is disguised by standard roof racks. The Envoy XL was longer than the short-wheelbase Yukon. It featured a retractable rear roof section that slid forward, giving an open-topped load area. A 'MidGate' could be raised to partition the load area off from the passenger compartment; this was a solid, waist-height plastic-lined panel and with a retractable glass partition for the top half. The two-way tailgate could either hinge sideways or drop down; the tailgate glass retracted into the solid tailgate. The cargo area was waterproofed and fitted with a drainage system, allowing it to be easily hosed down for cleaning. The advantage of the Envoy XUV over a pickup truck or a more truck-like configuration such as the Chevrolet Avalanche which originated the MidGate feature is that with retractable roof and rear

glass closed, the cargo area is sealed, full roof height and lockable, thus making it an enclosed SUV. The disadvantages include a much shorter cargo bed area and breakable side glass. Envoy XUV sales, projected at 30, per year approximately a third of Envoy production , were much slower with just over 12, sold in The final Envoy rolled off the assembly line when the Moraine, Ohio plant shut down. It is unknown if the Envoy name will return should the second generation of the TrailBlazer go on sale in the North American market. From Wikipedia, the free encyclopedia.
